Sample cover letter for journal submission pdf online free

Some journals ask that you identify a specific editor for your specialty. 3. Common phrases in this paragraph: Previous contact with the journal We state that we have had no previous contact with the journal regarding this submission. This study was presented in part at... This study was previously published in Japanese (citation) and... Briefly thank the journal editor for considering the manuscript and follow this with the full contact information of the corresponding author (name, academic degrees or professional qualifications; affiliation and postal address; telephone (and fax); email). Don't paste your abstract here. To help you write effective cover letters—and to write them quickly and easily—in this article we offer some tips on layout and appropriate wording. Some journals suggest including few additional details in the cover letter. Addressee's information and date of submission Opening salutation Purpose statement and administrative information Summary of main research findings and implications Statements or information required by the journal Closing salutation and your contact information Let's look at some tips for each section: For example, if you are submitting to a more general journal that has a diverse readership, underscore the possible impact your findings could have in multiple fields. Be sure to maintain a collegial tone to leave the journal editor with the best impression as he or she finishes reading your cover letter and moves on to evaluate your manuscript. Write the date beneath. Lastly, just as a reminder for members of ThinkSCIENCE's free annual rewards program, remember to claim your reward of free editing or translation of one cover letter alongside editing or translation of a full paper before the end of the March! Download the PDF version of this article Cover letters can be helpful to journal staff in the following ways. PhD Thesis Format | iLovePHD When you need to submit a cover letter with your manuscript, you'll probably write it just before submission. (Editor's name) Editor-in-Chief Journal name Dear Dr. /Prof. These are given in our downloadable Word template. Cover letters that include standard statements required by the journal allow the journal staff to quickly confirm that the authors have (or say they have) followed certain ethical research and publishing practices. A cover letter that is tailored to the journal, introduces your work persuasively, and is free from spelling and grammatical errors can help prime the editor to view your submission positively before he or she even looks over your manuscript. See the downloadable Word template for an example sentence that presents this information clearly and concisely. We will never spam you or sell your information and you can unsubscribe any time | Click to view privacy policy Cover letters should be short—preferably no more than 1 page—and they often use single line spacing. Some journals or publishers have very specific requirements. Cover letters can summarize your manuscript quickly for the journal editor, highlighting your most important findings and their implications to show why your manuscript would be of interest. Example Cover Letter for Journal Submission The best cover letter example for any publication (elsevier, wiley, IEEE, Springer, pubmed, Taylor and Francis, and SAGE) shown below: Date To Dr. / Prof. The author should assure the editor that there are no conflicts of interest to publish your manuscript. We previously contacted the journal to inquire about/ to check whether... Conflict of interests and financial disclosures The authors have no conflicts of interest to declare. Clearly state the purpose of your letter (that you are submitting a manuscript) and then state your manuscript title, author names (or first author "Brown et al."), and article type (e.g., original paper). Key points to include: Editor's name (you can find this on the journal webpage).Name of the journal/our article's title/Brief description of the novelty of the research and emphasis on your major research findings.A statement that your paper is not currently under consideration by another journal>Contact information for you and any co-authors/Confirm that you have no conflicts of interest/A list of potential reviewers (if asked by the journal)/Any researchers/reviewers who should not review your manuscript (if asked by the journal) Points to avoid: Keep your cover letter to a maximum of one page (brief introduction and overview).Don't copy your abstract into your cover letter; instead explain significance and novelty of your work in your own words.Don't use too much jargon or acronyms; instead use simple, easy and straightforward language.Avoid spelling and grammar errors and ensure your letter is professional before submitting. For example, "we look forward to your review of our manuscript" implicitly directs the editor to review your paper. Get featured articles and other author resources sent to you in English, Japanese, or both languages via our monthly newsletter. To minimize the number of line breaks used in your cover letter (and help keep it to one page of text), you can put the date to the right if you wish. | iLovePHD How to Write a Research Paper? If no handling editor is named, address your cover letter to the Editor-in-Chief. Instead, if you take sentences from your abstract as a base to work from, then try to craft a much shorter summary that clearly fits the journal's focus and that highlights the implications of your work for the journal's readers. (Editor's name) /I/we wish to submit a research manuscript entitled "(title of research article)" for publishing in your esteemed journal. The guidelines will tell you to copy and paste the sentence provided in quotation marks into the cover letter. No financial support was received for this study/work. Also, mention if your study closely relates to or extends your previously published work, so it is clear why your submitted manuscript is novel or important enough to publish. Before start writing your cover letter, check the instructions for authors of your journal for any specific information to be included in the cover letter. The cover letter should claim that your article is a good fit for the journal and it should highlight your major research findings. A good cover letter can voice your manuscript on behalf of you to the journal editor. Cover letters that contain all of the information required by the journal (as stated in the guideline for authors) can indicate that you have spent time carefully formatting the manuscript to fit the journal's style. In fact, Nature guidelines state specifically to "avoid repeating information that is already present in the abstract and introduction." When stating that you think your work is a good fit for the journal, be sure not to use exaggerated flattery. In a new paragraph, summarize the purpose of your research (the research gap or problem it addresses), the main findings, and finally the implications of these findings. Concurrent/duplicate submissions We declare that this manuscript has not been published before, in whole or in part, and is not currently being considered for publication elsewhere. To help you with this, iLovePHD imparts you how to write an effective cover letter to a journal for research article submission, providing examples of what should be included, what should not be included, and a sample template of the cover letter. Our specialist editors, translators, and writers are available to help create or revise the content to be error-free and, as part of our additional comprehensive Guidelines for Authors service, we can ensure the cover letter includes all of the statements required by the journal. Check the journal's website for the name of the editor who handles submissions; this could be the Managing Editor or an editor assigned to your geographical region. Write the name of the addressee in the top left corner of the page. When using the template, you can retain the statements in full, revise them slightly as appropriate to your circumstances, replace them with any similar wording required by the journal, or delete them if they do not fit your specific situation. For example, Springer states that cover letters should contain two specific sentences: "We confirm that this manuscript has not been published elsewhere and is not under consideration by another journal" and "All authors have approved the manuscript and agree with its submission to [insert the name of the target journal]." Several statements pertaining to research and publication ethics are commonly required by journals across a broad range of fields. These statements assert that the authors followed standard practices, which may include (i) adhering to ethical guidelines for research involving humans (Declaration of Helsinki), involving animals (ARRIVE guidelines), or falling under institutional guidelines; (ii) obtaining ethics approval from institutional review boards or ethics committees; (iii) obtaining informed consent or assent from participants; (iv) complying with authorship criteria (e.g., ICMJE criteria); (v) confirming no duplicate submissions have been made; and (vi) recommending reviewers for your paper, which may include specifying peers that you prefer not be contacted. /we do confirm that this work is original and the manuscript is not currently under consideration for publication elsewhere. Please address all the correspondence pertaining to this manuscript to me at (email address). Authorship A.B. conceived the study, analyzed the data, and drafted the manuscript; C.D. analyzed the data... All authors have approved the manuscript and agree with its submission to the journal. Clearly explain the novelty of your work and its significance and the reason to choose this journal for publication.) /we declare that all the authors (all the authors' name) of this manuscript agreed to submit the manuscript to the journal (Journal name). We hope our tips and Word template can help you create professional, complete cover letters in a time-effective way. In this study, we (examined/investigated/developed and tested)... Presenting your main results Our main findings/results were that... The most interesting/important findings were that... Most importantly, our findings can improve/reduce/help... Highlighting the relevance of your findings These findings should enable (engineers/doctors/local government) to... We believe that these findings will be of interest to the readers of your journal. Be sure to use the journal's own terminology to refer to the article type; for example, some journals use the term "Regular Articles" for a full research paper, whereas others use "Original Submissions", "Full Papers", "Original Articles", among others. Avoid statements that could be construed as presuming to give instructions to the editor: Some journals require that sentences are provided verbatim in the cover letter. Research Paper Format | iLovePHD How to Write a Thesis? Also, you can download our template cover letter (Word file) to help you save time writing and help you remember to include standard author statements and other information commonly required by journals. You can take this opportunity to describe why your manuscript will be of importance and interesting to the journal's readers, which is something that every journal editor looks for. You May Also Love to Read: How to Publish in High Impact Journals? For some journals, a cover letter is optional or may not be not required, but it's probably a good idea to include one. This creates a good first impression. The manuscript has been prepared as per the journal's guidelines and checked for language correction. Write the title and last name of the addressee (exclude the first name); for example, "Professor Brown" or "Dr. Baker" (British English: "Dr Baker"). Request to exclude reviewers We request that the following individual(s) not be approached to review our manuscript (because...). If you are submitting a revised paper to the same journal, note that the response letter to the reviewers is different from the cover letter used at initial submission. Be sure to review the journal's guidelines to know what information you should provide. Common phrases in this paragraph: Summarizing the purpose of your research This study presents/summarizes/examines... X remains a problem for (engineers/software developers/local government). If you can't find a named editor on the journal website, then you can use the opening salutation "Dear Editor". When submitting your manuscript to a journal, it is important to include a well-written cover letter which could help your paper to reach the next level of the process. And don't forget to download the template, which shows these tips already in place. Specify the theme or scope of the journal under which you are submitting the manuscript. (Journal editors may receive thousands of submissions annually, and many fulfill editing duties on top of their own research and teaching schedule, so you should strive to make their jobs easier by providing as concise a summary as possible.) Be sure to tailor your statements so that they're in line with the readership of the journal. Therefore, it is worth spending time to write a coherent and convincing cover letter for journal article submission. We also agree to transfer copyright from the authors to the journal. Some journals, such as Nature, state that while a cover letter is optional, it provides "an excellent opportunity to briefly discuss the importance of the submitted work and why it is appropriate for the journal." Some publishers, such as Springer, recommend that you write a cover letter to help "sell" your manuscript to the journal editor. The content can be broadly divided into six sections: Cover letters can be submitted as normal text files, such as Word, or input directly in a field in the journal's online submission system. In this new paragraph, provide any statements that the journal requires be included in your cover letter. Get the Word cover letter template Many journals require a cover letter and state this in their guidelines for authors (alternatively known as author guidelines, information for authors, guide for authors, guidelines for papers, submission guide, etc.). Also, we look forward to hearing from you "at your earliest convenience/as soon as possible" implicitly directs the editor to communicate with you quickly; instead, simply use a neutral but polite phrase such as "we look forward to hearing from you" or "we look forward to hearing from you in due course". 2. At the end of the opening salutation, you can use a comma or a colon; that is, "Dear Dr. Baker," or "Dear Dr. Baker:" (British English uses the comma; American English uses either, but the colon is considered more formal). 1. Using the format "3 February 2017" or "February 3, 2017" is clear. Thanking you Sincerely (Your name) Sample Cover Letter for Journal Submission I Hope, this article helps you to know how to write an effective cover letter with an example to a journal for research article submission. Suggested reviewers Potential reviewers for our manuscript are: We believe that the following individual(s) would be well suited to reviewing our manuscript. You can find tips and a template on writing effective response letters to the reviewers in our previous article. This is your main chance to highlight the value of your work to the journal editor, so keep this short and focused. Like many other authors, you may find yourself wondering what to write and taking longer than you expected, causing last-minute delays and stress. If your submission consists of many files, consider summarizing them in one short sentence so that the journal editor is sure all of the files have been received; for example, "There are 8 files in all: 1 main manuscript file, 1 highlights file, 3 figure files, 1 table file, 1 supplementary data file, and 1 supplementary figures file". For example, PLOS requires that authors describe any prior interactions with the journal in the cover letter, as well as suggest appropriate Academic Editors from the journal's editorial board to handle the submission. A suitable closing salutation is "Sincerely," or "Yours sincerely," Although the cover letter is not, strictly speaking, a part of your manuscript, it can affect how your submission is perceived by the journal editor. X.Y. advises Company A and has received lecture fees from Company B. Conversely, if you are submitting to a publication with narrow scope, you can write about your findings in highly focused terms. This study was supported by a grant from Z. (Briefly describe your research work in your own words. Avoid simply reproducing sentences verbatim from the abstract—which the journal editor will likely read next. Addressing the letter to a named editor at the journal also shows that you took the time to write your letter (and by extension, your manuscript) with care and considered the fit with the journal beyond just impact factor. Note that dates written as numerals only can be confusing: 02/03/2017 can be read "2 March 2017" in British and "3 February 2017" in American English. All authors approved the final version of the manuscript and agree to be accountable for all aspects of this work. Avoid using words like "esteemed" and "prestigious" to describe the journal: "We believe that these findings will be of interest to the readers of your esteemed/prestigious journal." It's helpful to the journal editor to state if your work directly relates to a paper published by another author in the same journal. This article provides the best cover letter example format for your easy understanding.
